- IBM ILOG Elixir

Misc:

- Subversion (SVN); TortoiseSVN; Versions SVN; Perforce (Source Control)
- Eclipse; Flex Builder; Flash Builder; NetBeans; FDT; ASDT
- FTP; SSH
- Windows and Mac literate

Skills Description:

I am primarily an interactive Flash/Flex interface developer - a designer by background, and a coder by conversion. My forte is dynamic Flash Platform-driven websites and RIAs (Rich Internet Applications). I also have strong back-end skills, to create complete standards-compliant web sites and applications to the very highest standard – in look, feel, functionality and usability.

I have design skills you would not find in most programmers, and programming skills you would not find in the vast majority of designers. My ActionScript skills are very strong, with object oriented programming (OOP) and design patterns.

Accolades:

I appeared on BBC Working Lunch in December 2004, interviewed by Adam Shaw discussing e-business. My Rich Internet (Flash) work has been showcased by Macromedia and Adobe at demos and workshops across Europe, and has appeared in numerous magazine publications.

Employment.

Mar 07 – Present, ongoing
